5. Instances

TUMBLE FEATURE

The Tumble Feature activates after every spin. When a winning combination occurs, all winning symbols disappear from the grid. The remaining symbols drop to the bottom, and new symbols fall from above to fill the empty positions. This process repeats as long as new winning combinations are formed. All wins from tumbles are accumulated and credited to the player's balance only after all resulting tumbles from the original spin have finished.

MULTIPLIER SPOTS FEATURE

Each time a winning symbol explodes, it marks its position on the grid. If another winning symbol explodes on the same spot again, a multiplier is added, beginning at **x2** and doubling with every additional hit—up to a **maximum of x128**. The multiplier applies to all winning combinations that fall on the marked spot. If multiple multipliers are involved in a win, they are combined. In the base game, these multiplier-marked spots remain active throughout the tumble sequence and are only cleared once no more tumbles occur.

FREE SPINS

Landing **3, 4, 5, 6, or 7 SCATTER symbols** awards **10, 12, 15, 20, or 30 free spins**, respectively. During Free Spins, marked multiplier spots persist throughout the entire feature and can continue to grow with ongoing tumbles. Hitting **3 to 7 SCATTER symbols** again during the bonus awards the same respective amount of additional free spins. Special reels are used during this feature.
