6. Instances

TUMBLE FEATURE

After each spin, winning combinations are paid, and the winning symbols disappear. The remaining symbols drop down, and new symbols fall from above to fill the gaps.

Tumbles continue until no new winning combinations appear.

All winnings from a base spin (including all resulting tumbles) are credited to the player's balance at the end.

- Scatter Symbol can appear in all reels
 - Randomly at any spin, normally marked paying symbols can appear in random positions on reels. When winning combinations are formed with marked symbol they transform into WILD for the next tumble
 - WILD Symbol can substitute all symbols except for Scatter
-

Transforming Symbols

During any spin, marked pa on paying symbols can randomly appear on reels 3 and 4.

If a winning combination includes a marked symbol, it transforms into a WILD for the next tumble.

TUMBLE MULTIPLIERS

In the base game, a win multiplier increases with each tumble: $x1 \rightarrow x2 \rightarrow x4 \rightarrow x8 \rightarrow x16 \rightarrow x32 \rightarrow x64 \rightarrow x128 \rightarrow x256 \rightarrow x512 \rightarrow x1024$.

From the 10th tumble onward, the multiplier stays at x1024 for all remaining tumbles.

The multiplier resets after all tumbles are complete.
